Not illustrated. 1916 Excerpt: .a straight transit line from north to south and without the ill-advised delivery loop subway now planned, which would tend to duplicate in Philadelphia the evils of Chicago s congested business center. Through-Routing. The logical method of transportation in any large city must be on a through-routing plan to be efficient. This shows beyond question that a train should not pass through the delivery district more than once in each direction per single trip. (See Diagrams, pages 48 and 49.) A rapid transit line for the purpose for which these are built in Philadelphia should be double-ended whenever possible, serving a residential district on each end and the business district in the central section, so that the expensive subway in the central section, which acts as a terminal of the two lines, may be used efficiently in both directions. This is known as through-routing method of...
